IBM Notifier Structure

The main IBM Notifier.app bundle is the entry point for every interaction with the tool.
The binary that expose the tool's CLI is stored in
IBM Notifier.app/Contents/MacOS/IBM Notifier

IBM Notifier.app

IBM Notifier Popup.app

IBM Notifier Alert.app

IBM Notifier Banner.app

IBM Notifier Onboarding.app

Those components are stored within the main app bundle in
IBM Notifier.app/Contents/Helpers/
They don't expose any direct access from the external and the only component able to interact with them is the main app.
